

REMARKS

Claims 3-27 are pending in the present application.

The Examiner has required election in the present application between:

Group I, claims 3-22, drawn to storing electronic money comprising determining whether a radio signal corresponds to general information or balance storing information and a computation logic block for comparing a serial number during balance storing into a card;

Group II, claims 23-25, drawn to determining whether a card service stop or release information is received by comparing certification information;

Group III, claim 26, drawn to determining whether a received radio signal corresponds to personal update information and updating the personal information based on a variable comparison; and

Group IV, claim 27 drawn to a method for storing electronic money using radio communication wherein certification includes encrypting values as certain keys for first balance storing information and second balance storing information.

ELECTION

**For the purpose of examination of the present application,
Applicants elect, with traverse, Group I, Claims 3-22.**

TRAVERSAL

Additionally, Applicants below-named representative was informed by Examiners Millin and Karmis, on July 6, 2006, that the restriction requirement has been withdrawn and that an Examiner's Interview Summary stating that fact is being mailed. However, because the USPTO's Private PAIR screen does not indicate that the Examiner's Interview Summary has been mailed, Applicants are filing this Reply in a timely manner.

One reason for traversing the restriction requirement is that restriction must never be required if the search and examination of an entire application can be made without serious burden, even though the application contains claims to independent and distinct inventions. See MPEP §803 The reasons for this are (a) that there are two criteria for proper restriction between patentably distinct inventions. The first is that the inventions must be independent or distinct as claimed, and the second is that there must be a serious administrative burden on the examiner to examine the claimed

Reply to Restriction Requirement dated June 7, 2006

inventions; and (b) 35 USC 121 makes restriction discretionary by stating that the Director may require an application to be restricted to one of two or more independent and distinct claimed inventions in an application.

With respect to the issue of "serious administrative burden," MPEP §§803, 808, 808.01 and 808.02 discuss and explain USPTO accepted meanings of serious administrative burden, but the Office Action fails to establish that any accepted meaning exists in this Application, where all of the claimed subject matter currently in issue has already been searched and examined on its merits in this Application.

Should there be any outstanding matters that need to be resolved in the present application, the Examiner is respectfully requested to contact Robert J. Webster, Registration No 46,472 at the telephone number of the undersigned below, to conduct an interview in an effort to expedite prosecution in connection with the present application.
